EXPERIENCE

JSON Developer / Potawatomi Training LLC - Hampton, VA   *11/2022 – 05/30/2023*

A web developer is a skilled professional responsible for designing, creating, and maintaining websites and web applications. They are proficient in various programming languages and frameworks, and they possess a deep understanding of web development technologies and best practices.

- Engineered responsive and cross-browser compatible user interfaces by leveraging HTML, CSS, and JavaScript, delivering 20+ projects on time and under budget.
- Assisted animators with image sizes and reconfigured images via Photoshop to be implemented in the JSON, and performed problem-solving and troubleshooting techniques to ensure each course was fully functional.
- Conducted thorough testing and debugging to identify and resolve any issues or bugs, ensuring the website functions optimally, and Optimized website performance by employing techniques such as caching, compression, and minimizing page load times.
- Implemented JSON configurations to enhance the functionality of existing templates and facilitate updates, and employed Git, a version control system, in conjunction with GitHub to implement updates to training modules.

Data Entry Specialist / Liberty Source PBC - Hampton, VA   *12/2019 – 07/2021*

As a Data Entry Specialist, I worked in the corporate events team of Liberty Source and helped a wide range of data for major financial brokers. I gained a well-rounded amount of knowledge regarding parsing data and understanding how cloud technologies work via Amazon Workspaces.

- Established, tracked, and maintained analytics using Microsoft Office applications (Word, Excel) to support data compilation and client reporting.
- Parsed over 100+ documents from many major financial institutions like Morgan Stanley and Credit Suisse.
- Became familiar with Amazon Workspaces and collaborated with team members when compiling data for corporate events that the companies needed at the time.
- Conducted overall quality checks, data validation and built long-term solutions to improve research, processes, and data output with an average typing speed of 40 wpm.

Signal Support Systems Specialist / United States Army - Fairbanks, AK   *01/2015 - 01/2019*

As a Signal Support Systems Specialist, also known as a Signal Support Systems Operator, I enlisted in the United States Army, where I gained valuable experience operating a diverse range of radio communication equipment and computer software. In this role, I was responsible for installing, operating, and maintaining signal support systems and equipment, ensuring seamless communication and connectivity for military operations or telecommunications networks.

- Identified issues and initiated troubleshooting methods for signal support services, including radio, wire, and battlefield automated systems.
- Demonstrated exemplary responsibility by maintaining 100% accountability for assigned communication equipment valued at over $500,000.
- Utilized Active Directory to grant computer access to fellow soldiers, ensuring efficient user management.
- Proficiently conducted unit-level maintenance on a variety of radios, including Sincgars, Tacstat, HF, and others, ensuring their optimal functionality.

EDUCATION AND TRAINING

Cybersecurity For Local Area Networks *12/2022*
Virginia Peninsula Community College - Hampton, VA

Computer Programming *02/2022*
Abco Technology – Los Angeles, CA

PROJECTS

- **Catalog App** Winter 2022 Hampton, VA

Created a Catalog App, utilized XML for frontend design and Java for backend development, implemented Async task for efficient   loading of news lists outside the main UI thread, and Leveraged the javax.crypto library to enhance security by utilizing the SALT feature for password concealment.

- **Instagram Design** Winter 2022 Hampton, VA

Recreated a responsive design of Instagram's homepage, using fundamental HTML5 and CSS. The result is an Instagram look-alike interface that provides a visually appealing and responsive user experience.
